Professional Summary

Software Developer with 1.8 years of experience in Java, Spring Boot, Microservices, MySQL, and RESTful API design. Experienced in using the Appian platform for developing process models, designing user interfaces, creating expression rules, and integrating systems. Committed to continuous learning and developing efficient and scalable software.

Skills

Backend: Java, Rest API, JPA, Microservices

Frontend: HTML, CSS, JavaScript, Angular

Frameworks: Spring Boot, Swagger, Angular 15

Tools/Platforms: Appian, Postman

Process: Agile, SDLC, Jira

Paradigms: OOPS, UML

Database: MySQL, MariaDB

Build: Maven

Version Control: Git, GitHub

IDE: Eclipse, Spring Tool Suite (STS), VS Code

Experience

Maveric Systems

Appian Developer

Jan 2025 - Present Pune, Maharashtra

- Implemented Aadhaar-based KYC validation for auto-fetching customer data, reducing manual entry.
- Developed a structured approval workflow with L1 and L2 review processes for efficient processing.
- Designed a KPI-driven, real-time dashboard to track approvals, pending applications, and workload.
- Integrated task management for bankers to track, approve, and reject applications.
- Created graphical insights and real-time analytics (line graphs, pie charts, bar charts) for decision-making.
- Automated workflow transitions between L1 and L2 for seamless application processing.

Maveric Systems

Appian Developer

Aug 2024 - Oct 2024 Pune, Maharashtra

- Implemented OTP-based verification for secure submissions, and a dashboard for streamlined task management.
- Designed user-friendly interfaces using Appian components (grids, forms, pickers, rich text, etc.).
- Developed milestone designs and dynamic visibility rules to enhance navigation and usability.
- Automated approval workflows using process models and business rules improve efficiency.
- Worked with process model components (Events, Gateways, User Tasks, Script Tasks, and Emails).
- Defined and managed record types with one-to-one and one-to-many relationships for data integrity.

Maveric Systems

Java Backend Developer

Dec 2023 - Jun 2024 Pune, Maharashtra

- Implemented JWT-based authentication and authorization using Spring Security for enhanced security.
- Designed and developed scalable REST APIs with robust global exception handling.

- Ensured comprehensive error handling for a seamless user experience.
- Integrated Swagger for API documentation, improving usability.
- Implemented a fallback mechanism for system resilience.
- Utilized Lombok and JPA for efficient entity management and data persistence.
- Created low-level design documents and UML diagrams (Sequence, Class, Flow) for system architecture and team collaboration.

Education

Dhole Patil College Of Engineering, SPPU

BE - Information Technology

Mar 2023 Pune, Maharashtra

Certifications

- Appian Associate Developer – Appian Community.
